CLOUDSPACE

Will you be able to restore your critical data if something happened today?

The 4levels Solutions CloudSpace offers a secure, flexible, and affordable solution tailored for the evolving needs of modern businesses. This in-country cloud storage service is designed to address the challenges of rising storage costs and unpredictable pricing, providing a reliable and accessible solution for long-term data storage.

USE CASES

- ✓ **Tape Replacement**: Provides a more reliable and accessible alternative to traditional tape storage systems.

- ✓ **Offsite Archive and Backup Storage**: Ideal for companies seeking secure, offsite solutions for their backup and archival needs.

THE CHALLENGE

Object storage consumption is growing at an ever-accelerating rate, fueled by explosive growth in the amount of data being generated. It is challenging to access object storage in a way that matches disk-level performance and it is difficult to consume as an end-user, or application, especially in distributed workflows.

THE SOLUTION

CloudSpace creates the best of both worlds, as it delivers a highly-sought-after solution for a setup where users and applications can connect to the same single name space, exposed as local disk but backed by object storage.

90%

of businesses losing data from a disaster are forced to shut down within two years

KEY FEATURES

✓ S3-Compatible Cloud Storage: Ensures seamless integration with S3 protocols, making it broadly applicable across various platforms.

✓ No Transfer, Egress/Ingress, or Transaction Fees: Eliminates unexpected costs, simplifying budget management.

✓ Predictable, Pay-As-You-Use Pricing: Charges based on actual usage, with peak usage monitored and billed accordingly, offering cost efficiency.

✓ Ideal for Long-Term Data Retention: Perfect for archival and backup needs, supporting compliance with data retention regulations.

✓ Easy Setup and Web-Based Management: User-friendly setup process and an intuitive management interface simplify administration.

✓ Support and Maintenance Included: Ensures reliable operation and quick resolution of issues, providing continuous service excellence.

✓ Local Data Storage: Data stored locally to meet regional compliance requirements and ensure faster access.
